Journal of Analytical and Applied Pyrolysis
44 (1998) 229–231

JOURNAL of ANALYTICAL and APPLIED PYROLYSIS

Subject Index

Analysis
Composition of oils derived from the batch pyrolysis of tyres, 131
Automation
The automation of a reactor flow system with online GC analysis, 167

Balkaya lignite
Desulphurization of two Turkish lignites in an entrained flow reactor, 65
Biomass
A novel test method for cracking catalysts, 193
Thermogravimetric analysis of olive stones with sulphuric acid treatment, 75
Bolu–Mengen lignite
Desulphurization of two Turkish lignites in an entrained flow reactor, 65

Catalysts
A novel test method for cracking catalysts, 193
Catalyst screening
A novel test method for cracking catalysts, 193
Chemical vapour deposition
IR laser photosensitized decomposition of trimethyl(2-propynyloxy)silane for chemical vapour deposition of polydimethylsiloxane phases, 219
Cis-1,4-polyisoprene
Thermal depolymerization and pyrolysis of *cis*-1,4-polyisoprene: preparation of liquid polyisoprene and terpene resin, 121
Coal oxidation
Modelling of volatile product evolution in coal pyrolysis. The role of aerial oxidation, 205
Coal pyrolysis
Production of *n*-alkanes and polycyclic aromatic hydrocarbons in coal pyrolysis, 89
Comparative infrared laser-powered homogeneous pyrolysis
Comparative infrared laser-powered homogeneous pyrolysis studies of triethylgallane, trimethylgallane, triisopropylgallane, triisobutylgallane, and tri-tert-butylgallane, 29
Computer controlled
The automation of a reactor flow system with online GC analysis, 167
Cornstraw
Pyrolysis kinetics of wheat and corn straw, 181
Cracking
A novel test method for cracking catalysts, 193

Desulphurization
Desulphurization of two Turkish lignites in an entrained flow reactor, 65
Differential thermal analysis
Modelling of volatile product evolution in coal pyrolysis. The role of aerial oxidation, 205

Epidemiology
An epidemiological study of *Staphylococcus intermedius* strains isolated from dogs, their owners and veterinary surgeons, 49
Evolution
An epidemiological study of *Staphylococcus intermedius* strains isolated from dogs, their owners and veterinary surgeons, 49

Flame ionisation detector
Pyrolysis gas chromatography of some coals by nitrogen and phosphorus, flame ionisation and mass spectrometer detectors., 101

Gas phase analyses
Thermal decomposition mechanisms of tetraethylgermane in metal-organic chemical vapor deposition, 153

0165-2370/98/$19.00 © 1998 Elsevier Science B.V. All rights reserved.
PII S0165-2370(97)00089-2

Gas-phase pyrolysis
Comparative infrared laser-powered homogeneous pyrolysis studies of triethylgallane, trimethylgallane, triisopropylgallane, triisobutylgallane, and tri-tert-butylgallane, 29
Germanium thin films
Thermal decomposition mechanisms of tetraethylgermane in metal-organic chemical vapor deposition, 153

Hexachlorobenzene
Study of the gas phase combustion of hexachlorobenzene, influence of the oxygen concentration : Attempt at a global kinetic formulation, 1
High temperature
Study of the gas phase combustion of hexachlorobenzene, influence of the oxygen concentration : Attempt at a global kinetic formulation, 1
β-Hydride elimination
Comparative infrared laser-powered homogeneous pyrolysis studies of triethylgallane, trimethylgallane, triisopropylgallane, triisobutylgallane, and tri-tert-butylgallane, 29
Hydrogen spillover
Impacts of hydrogen spillover on the reduction behavior of tungsten oxide: Isothermal and non-isothermal approaches, 13

Kinetics
Thermogravimetric analysis of olive stones with sulphuric acid treatment, 75

Laser induced decomposition
IR laser photosensitized decomposition of trimethyl(2-propynyloxy)silane for chemical vapour deposition of polydimethylsiloxane phases, 219
Lignin
Thermogravimetric analysis of olive stones with sulphuric acid treatment, 75
Linear hydrocarbons
Production of *n*-alkanes and polycyclic aromatic hydrocarbons in coal pyrolysis, 89

Mass spectrometer detector
Pyrolysis gas chromatography of some coals by nitrogen and phosphorus, flame ionisation and mass spectrometer detectors., 101

Nitrogen and phosphorus selective detector
Pyrolysis gas chromatography of some coals by nitrogen and phosphorus, flame ionisation and mass spectrometer detectors., 101
Nitrogen atmosphere
Desulphurization of two Turkish lignites in an entrained flow reactor, 65

On-line gas chromatographic analyses
Thermal decomposition mechanisms of tetraethylgermane in metal-organic chemical vapor deposition, 153
Online thermolysis setup
The automation of a reactor flow system with online GC analysis, 167
Oxidation
Study of the gas phase combustion of hexachlorobenzene, influence of the oxygen concentration : Attempt at a global kinetic formulation, 1

Phenetic classification
An epidemiological study of *Staphylococcus intermedius* strains isolated from dogs, their owners and veterinary surgeons, 49
Phylogeny
An epidemiological study of *Staphylococcus intermedius* strains isolated from dogs, their owners and veterinary surgeons, 49
Polycyclic aromatic hydrocarbons
Composition of oils derived from the batch pyrolysis of tyres, 131
Production of *n*-alkanes and polycyclic aromatic hydrocarbons in coal pyrolysis, 89
Preparation of liquid polyisoprene
Thermal depolymerization and pyrolysis of *cis*-1,4-polyisoprene: preparation of liquid polyisoprene and terpene resin, 121
Pyrolysis
A novel test method for cracking catalysts, 193
Composition of oils derived from the batch pyrolysis of tyres, 131
Desulphurization of two Turkish lignites in an entrained flow reactor, 65
Impacts of hydrogen spillover on the reduction behavior of tungsten oxide: Isothermal and non-isothermal approaches, 13
IR laser photosensitized decomposition of trimethyl(2-propynyloxy)silane for chemical vapour deposition of polydimethylsiloxane phases, 219
Study of the gas phase combustion of hexachlorobenzene, influence of the oxygen concentration : Attempt at a global kinetic formulation, 1
The automation of a reactor flow system with online GC analysis, 167

Thermal depolymerization and pyrolysis of *cis*-1,4-polyisoprene: preparation of liquid polyisoprene and terpene resin, 121
Thermogravimetric analysis of olive stones with sulphuric acid treatment, 75
Pyrolysis gas chromatography
Pyrolysis gas chromatography of some coals by nitrogen and phosphorus, flame ionisation and mass spectrometer detectors., 101
Pyrolysis kinetics
Pyrolysis kinetics of wheat and corn straw, 181
Pyrolysis mass spectrometry
An epidemiological study of *Staphylococcus intermedius* strains isolated from dogs, their owners and veterinary surgeons, 49
Pyrolysis modelling
Modelling of volatile product evolution in coal pyrolysis. The role of aerial oxidation, 205
Pyrolysis of tetraethylgermane.
Thermal decomposition mechanisms of tetraethylgermane in metal-organic chemical vapor deposition, 153
Pyrolysis vapours
A novel test method for cracking catalysts, 193

Quantitative conversion
Study of the gas phase combustion of hexachlorobenzene, influence of the oxygen concentration : Attempt at a global kinetic formulation, 1

Reaction kinetics
Modelling of volatile product evolution in coal pyrolysis. The role of aerial oxidation, 205
Reduction behavior
Impacts of hydrogen spillover on the reduction behavior of tungsten oxide: Isothermal and non-isothermal approaches, 13

Si/C/H/O films
IR laser photosensitized decomposition of trimethyl(2-propynyloxy)silane for chemical vapour deposition of polydimethylsiloxane phases, 219

Terpene resin
Thermal depolymerization and pyrolysis of *cis*-1,4-polyisoprene: preparation of liquid polyisoprene and terpene resin, 121
Thermal analysis
Thermogravimetric analysis of olive stones with sulphuric acid treatment, 75
Thermal depolymerization
Thermal depolymerization and pyrolysis of *cis*-1,4-polyisoprene: preparation of liquid polyisoprene and terpene resin, 121
Thermogravimetry
Modelling of volatile product evolution in coal pyrolysis. The role of aerial oxidation, 205
Trimethyl(2-propynyloxy)silane
IR laser photosensitized decomposition of trimethyl(2-propynyloxy)silane for chemical vapour deposition of polydimethylsiloxane phases, 219
Tungsten oxide
Impacts of hydrogen spillover on the reduction behavior of tungsten oxide: Isothermal and non-isothermal approaches, 13
Tyres
Composition of oils derived from the batch pyrolysis of tyres, 131

Wheat
Pyrolysis kinetics of wheat and corn straw, 181

Zeolites
A novel test method for cracking catalysts, 193
Zoonoses
An epidemiological study of *Staphylococcus intermedius* strains isolated from dogs, their owners and veterinary surgeons, 49
